Author Index Volume 135 (2001)

Acosta, G., Lagrange and average interpolation over 3D anisotropic elements 91–109
Álvarez-Nodarse, R. and **J.C. Medem**, q-Classical polynomials and the q-Askey and Nikiforov–Uvarov tableaus 197–223
Álvarez-Nodarse, R., see **Medem, J.C.** 157–196
Ang, W.T. and **A.B. Gumel**, A boundary integral method for the three-dimensional heat equation subject to specification of energy 303–311

Cahlon, B., see **Hu, G.-D.** 125–133

Driver, K. and **P. Duren**, Zeros of ultraspherical polynomials and the Hilbert–Klein formulas 293–301
Duren, P., see **Driver, K.** 293–301

Groisman, P. and **J.D. Rossi**, Asymptotic behaviour for a numerical approximation of a parabolic problem with blowing up solutions 135–155
Gumel, A.B., see **Ang, W.T.** 303–311

Howle, V.E. and **L.N. Trefethen**, Eigenvalues and musical instruments 23– 40
Hu, G.-D., G.-D. Hu and **B. Cahlon**, Algebraic criteria for stability of linear neutral systems with a single delay 125–133
Hu, G.-D., see **Hu, G.-D.** 125–133
Huang, T.-Z., see **Wang, C.-L.** 325–333
Hugger, J., A theory for local, a posteriori, pointwise, residual-based estimation of the finite element error 241–292

Jeon, Y., New indirect scalar boundary integral equation formulas for the biharmonic equation 313–324

Karatsuba, E.A., On the asymptotic representation of the Euler gamma function by Ramanujan 225–240
Kohaupt, L., Differential calculus for some p-norms of the fundamental matrix with applications 1– 21

Lin, E.B. and **X. Zhou**, Connection coefficients on an interval and wavelet solutions of Burgers equation 63– 78

Marcellán, F., see **Medem, J.C.** 157–196
Medem, J.C., R. Álvarez-Nodarse and **F. Marcellán**, On the q-polynomials: a distributional study 157–196
Medem, J.C., see **Álvarez-Nodarse, R.** 197–223
Minamoto, T., Numerical existence and uniqueness proof for solutions of nonlinear hyperbolic equations 79– 90

Noor, M.A., Modified resolvent splitting algorithms for general mixed variational inequalities 111–124

Rossi, J.D., see **Groisman, P.** 135–155

Senhadji, M.N., On condition numbers of the *Shanks transformation* 41– 61

Trefethen, L.N., see **Howle, V.E.** 23– 40

Wang, C.-L. and **T.-Z. Huang**, New convergence results for alternating methods 325–333

Zhou, X., see **Lin, E.B.** 63– 78
